

Introduction

My Smart Internet are a company that specialises in providing a comprehensive range of online IT solutions for all businesses, from the small one-man-band up to the largest of multi-national companies.

As a company, we have experience in all aspects of IT from initial consultation, installation and on-going support utilising methods normally reserved for large organisations but available to all our clients to provide an un-paralleled solution to protect and resolve any project or issue.

Not only can we advise businesses on their IT strategies, and implement, but we also provide round the clock support for the networks that utilise our solutions. Our associated resources are effective at a time when every business should produce maximum results from knowing that their system is in 'safe hands'. We design and install solutions that fit nicely into your business model giving you peace of mind, knowing that you don't necessarily need to 're-invent the wheel' to use a new system. Our environments are intuitive and simple to use and we supply a range of solutions, tailored to meet specific requirements, aimed at producing specific results for you and your business.

The team here at My Smart Internet has one thing in common, "comprehensive online IT solutions" with a range to cover every aspect of your business including:

- ✓ **Websites & Content Management Systems**
- ✓ **Development of Online Applications**
- ✓ **Email Marketing**
- ✓ **Search Engine Optimisation**
- ✓ **Offsite Data Backup & Recovery**
- ✓ **Hosting, DNS & Domain Name Support**
- ✓ **Remote IT Business Support**
- ✓ **Email inc. Exchange, Office 365, POP & IMAP**
- ✓ **Cloud based SPAM & Anti-Virus protection**

We, as a team, pool our resources and share our experiences. We understand your needs and know that businesses need to continue working. We take that knowledge, analyse each client's requirements and then translate the brief into a practical and effective solution.

Our expert team members have worked with the following clients, to name but a few:
